Education

KLE College of Engineering & Technology, Chikodi

Bachelor of Engineering – Computer Science & Engineering

2023 – 2027

CGPA: 8.17/10

Experience

X7 IT Technologies

Jan 2025 – Oct 2025

MERN Developer Intern (Backend)

Belagavi, Karnataka, India (Remote)

- Developed a Real Estate Business Platform as a backend developer using the Django framework, building REST APIs for real-time notifications, secure messaging, and advanced property search powered by MongoDB.
- Awarded Best Outgoing Performer (Backend Skills) for outstanding project quality, technical contribution, and teamwork.

Projects

HRMS – Human Resource Management System

JSP · MERN · MySQL

- Designed and developed a complete HRMS for KLECET enabling centralized management of all staff records, featuring a multi-tier leave approval workflow (Employee → HOD → Office → Principal).
- Performed a full security audit – fixed SQL injection vulnerabilities, replaced insecure password storage with SHA-256 + salt hashing, implemented a custom security filter, and migrated hardcoded credentials to environment variables.
- Converted the application into a fully responsive, cross-device UI while preserving existing business logic and theme.

SecureFund – Blockchain-Based Fund Distribution Platform

MERN · Solidity · Ethereum

- Built a decentralized fund distribution platform eliminating intermediary corruption via Ethereum smart contracts (Solidity) with conditional fund release logic and MetaMask wallet integration for real-time peer-to-peer transfers.
- Maintained a full on-chain audit trail and applied OOP and design patterns to the smart contract architecture.

WAT-WISE – IoT & ML Based Energy Monitoring System

Python · IoT · ML · Mobile

- Building an IoT + ML system that monitors appliance-level electricity consumption and applies scikit-learn/TensorFlow models to predict energy prices and recommend optimization schedules.
- Integrating cloud APIs, embedded IoT sensors, and ML inference with a mobile app for remote appliance control.

Achievements

- **Vice-President, Coding Club, KLECET** – Leading technical initiatives and mentoring the student developer community.
- **Organized INVENTRA-2k25** – KLECET's first 24-hour national-level hackathon, demonstrating leadership and full-scale event management.
- **Top 10 Finalist, DVG Hackathon 2024** – National-level hackathon held in Davangere.

Technical Skills

Programming Languages: C, C++, Python, Java, JavaScript

Web & Frameworks: HTML, CSS, React.js, Tailwind CSS, Node.js, Express.js (MERN Stack)

Databases: MySQL, MongoDB

Cloud & DevOps: AWS, Docker, Jenkins, CI/CD

Tools & Platforms: Git, GitHub, Postman, VS Code, Jupyter Notebook

Core Concepts: Data Structures & Algorithms, OOP & Design Principles, REST APIs, TCP/IP Networking

AI/ML & AI-Assisted Development: Scikit-learn, TensorFlow, Generative AI, GitHub Copilot, ChatGPT, Claude
