Phone: +91 9880931429 — Email: chougalaprajwal@gmail.com — LinkedIn — GitHub

Education

KLE College of Engineering & Technology, Chikodi **2023 – 2027**
Bachelor of Engineering – Computer Science & Engineering *CGPA: 8.88/10*

Experience

X7 IT Technologies **Jan 2025 – Jun 2025**
MERN Developer Intern (Backend) *Belagavi, Karnataka, India (Remote)*

- Developed backend authentication for a real estate platform using Spring Boot and Spring Security, implementing secure login and signup, JWT token generation and validation, session management, and MongoDB integration (Spring Data MongoDB) for user data storage and retrieval. Awarded **Best Outgoing Performer (Backend Skills)** for technical contributions and teamwork.

Projects

HRMS – Human Resource Management System **Java (JSP/Servlet) · MySQL · Apache Tomcat**

- Developed HRMS backend modules using Java, JSP, and Servlets, implementing authentication, role-based access control, database integration, and a multi-level leave approval workflow (Employee → HOD → Office → Principal).
- Audited 20+ application files and addressed SQL injection vulnerabilities, replaced insecure Caesar-cipher password storage with salted hashing, and externalized database credentials to strengthen application security.
- Deployed the HRMS on Apache Tomcat, configuring environment variables, database connectivity, and database health checks to support reliable application startup and operation.
- Live Demo : KLECET HRMS

SecureFund – Blockchain-Based Fund Distribution Platform **MERN · Solidity · Ethereum**

- Engineered the Node.js and PostgreSQL backend for a blockchain fund distribution platform, integrating Ethereum smart contracts via ethers.js on the Sepolia testnet to record and verify fund-request transactions.
- Secured and optimized the system with JWT authentication, role-based access control, rate limiting, caching, pagination, and indexing, and cut gas costs by storing only hashes and metadata on-chain.

Personal AI Assistant – Groq-Powered Chat Assistant **Python · Groq API · Web UI**

- Developed a resume-grounded AI assistant with a Python/Django backend integrated with the Groq API for low-latency LLM inference, constraining the model through system-prompt design to answer strictly from resume content.
- Reduced hallucinations and off-topic responses by adding out-of-context query handling with graceful fallback replies, and lowered API cost and latency through token optimization (concise context injection and capped response lengths).
- Live Demo : Prajwal's AI Assistant

Achievements

- **Vice-President, Coding Club, KLECET,chikodi** – Leading technical initiatives and mentoring the student developer community.
- **Organized INVENTRA-2k25** – KLECET's first 24-hour national-level hackathon, demonstrating leadership and full-scale event management.
- **Top 10 Finalist, DVG Hackathon 2024** – National-level hackathon held in Davangere.

Technical Skills

Languages: Python, Java, JavaScript, C
Backend & APIs:Spring Boot, Django, FastAPI, REST APIs, JWT Authentication, Java (JSP/Servlet),React.js
Databases: PostgreSQL, MySQL, MongoDB
AI & LLM Integration: Groq API, Prompt Engineering, Hallucination Handling, Token Optimization, RAG (basics)
Tools & DevOps: Git, GitHub, Postman, Apache Tomcat, Maven, AWS (exposure)
Core Concepts: Data Structures & Algorithms, OOP & Design Patterns, Rate Limiting, Caching
